Journal of International Money and Finance

In recent years, the field of international finance has greatly expanded. Interest in foreign exchange markets, international monetary arrangements, macro-economic and financial-market adjustments in open economies has increased greatly, not only among academics in the field of economics and finance but among applied researchers in government and industry. The aim of the *Journal of International Money and Finance* is to bring together the best thinking of individuals in all three groups on such issues. The goal of the *JIMF* is to publish high-quality research papers in all areas of international finance and open-economy macroeconomics and money. Topics of interest include, but are not confined rigidly to: foreign exchange markets, balance of payments; international monetary arrangements; international interactions of prices, incomes and money; finance of multinational corporations; foreign aid; and international economic institutions. Those wishing to submit articles (which are referred before acceptance for publication) should send three copies to the Editor, James R Lothian, at the address below.
